TAR SANDS

If you don't like what you discover - take action - express your views!

RBS is investing huge amounts of taxpayer's bank-bailout money into the **TAR SANDS** dirty oil extraction industry - one of the most environmentally destructive, most carbon-emitting, most extensively polluting industries on earth. It affects an area at least the size of England, and its toxins are causing deaths from cancer.

Government are turning a blind eye - and hope you will too. Ask your MP to tell them *your views*.

You are about to face big cut-backs in public services due to the billions of pounds of your money now in RBS - which averages at £ thousands from each one of you. Find out what RBS are doing with your money by visiting www.wdm.org.uk and www.dragonfly1.plus.com. Tell Government to stop these dirty investments. It can do so due to our 84% stake in RBS.
